

USE OF DHEA OR PRECURSORS OR METABOLIC DERIVATIVES THEREOF
AS A DEPIGMENTING AGENT

ABSTRACT OF THE DISCLOSURE

The use of DHEA or at least one of its biological precursors or of its metabolic
5 derivatives in or for the manufacture of a composition for topical application to the skin, as a
pigmentation regulator for the skin or its superficial growths, especially as a depigmenting
and/or bleaching agent for the skin, in particular in the treatment of pigmentation marks, and
as a pro-pigmenting agent for superficial body growths.
